*Welcome to the 10th issue of Invest Salone's
quarterly newsletter*

We have now evaluated our programme results up to the end of the fourth year of Invest Salone, which ran through September 2023. The numbers are clear: We have supported impact investors to **unlock £10 million in investment** for Sierra Leonean businesses, and we have **supported 40 businesses to become more productive and competitive**. We have also **produced 30 reform-oriented products** to inform policies and regulations.

All of these efforts continue in 2024. As part of our work to inform policies and regulations in support of private sector-led growth, we published an **assessment of the Poultry Feed Sector** highlighting the sector's challenges and investment opportunities, as well as recommendations on how to improve productivity.

Through Invest Salone's **Technical Assistance Facility (TAF)**, we support firms to become more competitive. Our **recently published resource** explains more about TAF and what the process involves.

Our growing Resource Bank also includes a **series of investment insights** which provide a wealth of information on key sectors and crops, as well as case studies which explore how Invest Salone's work applies to real business situations.

spotlighting how our PROSPER Salone grant to London-based impact investing group Truestone, and its portfolio company A Call to Business (ACTB) Savings and Loans, is helping to support women in business. It was great to hear directly from two Freetown-based women who took out micro-loans with ACTB, enabling both to expand their businesses.

Follow our social media channels for more updates on Invest Salone's work in Sierra Leone.

Supporting women to build profitable and sustainable businesses not only benefits them but also their communities and countries. Find out how Invest Salone is working with its partners to invest in women and accelerate progress.

PUBLICATIONS

Poultry Feed Sector Assessment

This report is based on a scoping visit to Sierra Leone and engagement with the six largest poultry companies in the country. The Sierra Leone poultry industry is positioned to grow rapidly over the next decade. Increasing local and regional demand for chicken and chicken products presents significant investment opportunities, but challenges are faced by the sector.
